

Knee Arthroscopy

Treating Your Knee Problem

The growing interest in exercise has made knee injuries common. The knee is a complex and active joint. This makes the knee easy to injure or damage. Knee arthroscopy is a popular method to diagnose, monitor, and treat common knee problems. It typically causes much less pain than other kinds of surgery. Healing time can be much shorter and patients usually go home on the same day. Also, it leaves small scars.

This booklet will teach you about knee anatomy, common knee problems, and arthroscopy.

Knee Arthroscopy

8" x 10" 8 pages

Item #KABK \$0.95 each
